

Trijicon RMR™ Series

When precision is the only option, your best option is the Trijicon RMR™ sight. Built to provide optimum red-dot visibility with a minimal profile, you can acquire and hit your target quickly and more accurately.

STRONG

The new Trijicon RMR (Ruggedized Miniature Reflex) has been introduced to match the legendary toughness of the Trijicon ACOG® (Advanced Combat Optical Gunsight). It can be teamed up with the ACOG for the ultimate in fast target acquisition or precise aiming at extended distances.

The RMR offers two illumination configurations. One choice is an innovative LED (light emitting diode) insert that automatically adjusts for brightness in any lighting situation and ensures optimum visibility of the red dot against the target. The second option is a dual-illuminated, battery-free model featuring Trijicon fiber optics and tritium.

The RMR housing design incorporates computer-optimized geometry that absorbs impacts and diverts stresses around and away from the lens. This design improves durability and eliminates the need for protective shields or covers.

PRECISE

Accuracy is further enhanced with adjustments for windage and elevation. And clarity is assured with the sight's ultra-clear, hard-coated lens.

The LED RMR is powered by a long-life lithium battery that delivers 17,000 hours of battery life or more. The dual-illuminated RMR never needs batteries, thanks to its tritium and fiber-optic illumination.

Designed with a rugged aluminum housing, the RMR delivers superior performance under the most extreme conditions for virtually all military, law enforcement, and for all types of hunting and shooting applications. This versatile sight is right on target for handguns, carbines, rifles and shotguns.

Trijicon RMR™ (Ruggedized Miniature Reflex)

The World's Toughest Red Dot Sight

Developed to improve precision and accuracy with any style or caliber of weapon, the Trijicon RMR™ (Ruggedized Miniature Reflex) is designed to be as durable as the legendary Trijicon ACOG®.

The RMR is available in two illumination options: a battery-free model featuring Trijicon fiber optics and tritium and an LED version powered by a standard CR2032 battery.

Housed in rugged forged aluminum, the RMR is extremely tough yet lightweight. New, easy-to-use adjusters with audible clicks allow for quick windage and elevation adjustments.

The new Trijicon RMR is tougher than any alternative and suitable for military, law enforcement and hunting applications.

Over 17,000 Hours of Battery Life

CR2032 battery can last up to 35,000 hours to 4 years in dark storage.

Bright LED Illumination

Adjusts for brightness by light situation.

Model RM01

Adjustable Elevation

Easily adjustable without special tools. 1 MOA per click.

Trijicon Fiber Optics

Automatically adjusts the brightness level and contrast of the reticle to available light conditions.

Trijicon Tritium-Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

Model RM03

True-Color Multi-Coated Lens

Creates a wide-band light transmission for minimal change in target area color.

Adjustable Windage

Easily adjustable without special tools. 1 MOA per click.

7075-T6 Military-Grade Aluminum-Alloy Housing
For extreme durability.

Lifetime Warranty
Backed by Trijicon quality and service.

 Proudly Made in the U.S.A.

 **Waterproof**
Completely waterproof to a depth of 66 feet/20 meters.
