

Trijicon® Reflex Series

When you're in the field, it's you, your weapon and your Reflex. The Trijicon® Reflex helps you quickly engage and lock onto moving targets, providing speed and precision for critical situations. And the new RX30 provides for an even wider peripheral view. It's the precise advantage you need.

AGILE

Dual-illuminated and parallax free, Trijicon Reflex offers increased field-of-view capabilities that provide fast, both-eyes-open target acquisition and accurate aiming for the military, law enforcement and hunting enthusiasts.

New to the line is the RX30 Reflex sight that features a 42mm, clear-aperture lens for a generous field-of-view and a large sight picture. It allows you to move the firearm freely and remain on target at multiple shooting angles when surveying an area. As a result, the

Reflex is considered by many marksmen to be the fastest and most user-friendly sight in the field — any field.

Allowing accurate both-eyes-open shooting that expands peripheral view, this advanced sight provides a critical advantage when you're aiming on the move, in low-light situations, or even in darkness.

VERSATILE

With the Reflex, a glowing tritium lamp ensures a bright amber reticle at night or in low-light conditions, while advanced fiber optics deliver ambient light to the aiming point during the day. A multi-layer dichroic-mirrored lens delivers wide-band light transmission.

And, adjustments for windage and elevation further improve accuracy.

Reflex is available with four reticle options to match your shooting requirements: one triangle, one chevron and two different size dots.

DEPENDABLE

Nearly indestructible, the Reflex features a military-grade housing that's investment cast from aircraft aluminum alloy and hard-coat anodized. Tested to military standards, the sight stands up to, and performs under, the most extreme environmental conditions. Batteries? None needed; it's totally battery free.

With performance and reliability like this, it's no wonder the Reflex was selected for the SOPMOD M4 Accessory Kit fielded by all U.S. Special Operations forces.

Trijicon® Reflex

Model RX01

Model RX01NSN

Model RX06-10

Trijicon® Reflex – The Fastest, Most User-Friendly Sight in the Field

Dual-illuminated and parallax free, the Trijicon® Reflex sight was designed for close-quarter battles and is unrivaled in both speed of target acquisition and pinpoint accuracy.

The Trijicon Reflex allows soldiers, law enforcement officers and hunters to shoot with both eyes open – a critical advantage for those who must aim while moving, or in darkness.

Accuracy is enhanced with its dual-illuminated reticle. A glowing tritium lamp ensures a bright amber reticle at night or in low-light conditions, while advanced fiber optics deliver ambient light to the aiming point during the day. Batteries are not required.

Trijicon® Reflex Reticle Options:

Triangle and two different Dots – to match your specific shooting requirements.

14.9 MOA

Created with

Adjustable Elevation

Advanced Fiber Optics

Automatically adjusts the brightness, view, and contrast of the reticles to available light conditions.

Military-Grade Aluminum-Alloy Housing

Investment Cast aircraft-aluminum-alloy housing provides for a nearly indestructible sighting system.

Adjustable Windage

Proudly Made in the U.S.A.

Model RX30

Trijicon Tritium-Phosphor Lamp

Aiming reticle glows in low-light conditions for quick target acquisition. Lamp is guaranteed to illuminate up to 15 years.

Trijicon Reflex Provides a True-Color Multi-Coated Lens

Creates wide-band light transmission.
